FINAL RELEASE

NuTech Solutions Adds Leading Edge Optimization to Engineous' iSIGHT Platform

CHARLOTTE, NC - January 11, 2007 - NuTech Solutions, a leader in the commercialization of advanced software for modeling and optimization, today announced a partnership with Engineous Software, the recognized market leader in Process Integration and Design Optimization. Under the agreement, Engineous will integrate NuTech Solutions' proprietary evolutionary strategy optimizer, ClearVu Global Optimizer, into its iSIGHT-FD product to provide its customers with a superior optimization alternative. For NuTech, the deal is one of several partnerships leveraging the significant advantage of evolutionary strategies within the ClearVu Global Optimizer for multi-disciplinary optimization.

Engineous' iSIGHT products allow companies to move beyond manual design analysis and dig deeper into design exploration. Using integration, automation, and optimization capabilities, companies are able to improve design processes and impact businesses through better, more rapid product introductions. Incorporating NuTech Solutions' ClearVu Global Optimizer within the iSIGHT platform significantly reduces the time to achieve measurable design improvements.

Using a virtual development process, the ClearVu Global Optimizer handles hundreds of design parameters in nonlinear multi-disciplinary design optimization tasks. The joint solution from Engineous and NuTech accelerates product development time because the evolutionary strategies embedded within the ClearVu Global Optimizer can find very high quality designs in high-dimensional design spaces with fewer simulator calls. In addition, the optimizer is able to deal with mixed parameter types, as well as multi-objective tasks, such that all requirements of modern virtual engineering design processes can be dealt with in an integrated environment.

"Finding innovative solutions faster than ever before provides real competitive advantage for our clients," said Janet C. Wylie, President and CEO of Engineous. "Incorporating NuTech's ClearVu Global Optimizer into our iSIGHT platform is another step we have taken to provide our users with the most efficient design improvement solution on the market."

"NuTech Solutions is pleased to partner with technology leaders like Engineous that recognize the value in offering customers leading edge optimization solutions," said Bud Whitmeyer, CEO of NuTech Solutions. "Our ClearVu Global Optimizer uses the latest scientific techniques to enable businesses to solve complex multi-dimensional problems with a high degree of certainty considered impossible in the past."

About NuTech Solutions

NuTech Solutions, Inc. delivers innovative solutions, powered by Intelligent Business Engines™ that forecast, optimize and learn – delivering insight and measurable results to Global 1000 companies. Our solutions are designed to solve complex problems in a variety of industries, including automotive, consumer goods, petroleum, financial services and national security.

Based in Charlotte, N.C. and with offices around the world, NuTech Solutions' client roster includes General Motors, BMW, Oxy, Beiersdorf, Air Liquide, Ford Motor Company, Chevron and many U.S. Government Departments and Agencies. For more information call (704) 943-5400 or visit www.nutechsolutions.com.

About Engineous Software, Inc.

Engineous Software, Inc. provides process integration and design optimization software solutions and services. The company's iSIGHT software integrates key steps in the product design process, then automates and executes those steps through design exploration tools like optimization, DOE, and DFSS techniques. The FIPER infrastructure links these processes together in a unified environment. Through FIPER, models, applications and "best" processes are easily shared, accessed, and executed with other engineers, groups, and partners. Engineous operates numerous sales offices in the U.S., as well as wholly owned subsidiaries in Asia and Europe. Customers include leading Global 500 companies such as Canon, General Electric, General Motors, Pratt & Whitney, Honeywell, Lockheed Martin, Toshiba, MHI, Ford Motor Company, DaimlerChrysler, Toyota, Nissan, Renault, Hitachi, Peugeot, MTU Aero Engines, TRW, BMW, Rolls Royce, and York International. Additional information and a full list of Engineous solution components may be found at www.engineous.com.
